

Consultancy Services

Our Approach

Thameswey Sustainable Communities offers a wide range of experienced energy and sustainability consultancy services providing sound, independent and objective advice on sustainable design for all types of developments.

We are adept at liaising with all parties in the development process including architects, designers, site managers, developers, and local planning authorities.

Thameswey Sustainable Communities approach to projects is based on achieving the most economical and sustainable solution for our clients. Using accredited software and our innovative online carbon impact tool C-Plan, we offer technical advice and guidance that provides value for money without compromising on quality.

Our Accreditations

Recent Projects

17 New Apartments, Ascot

We were commissioned by Kebell Developments to provide a Renewable Energy Options Appraisal, Energy Statement, SAP calculations and Code for Sustainable Homes assessments to support its planning application for the construction of 17 apartments in Ascot.

Mixed Retail and Residential Development, Rickmansworth

CgMs Consulting commissioned Thameswey Sustainable Communities to provide a Renewable Energy Options Appraisal, Energy Statement and SBEM & SAP calculations to support its planning application for the construction of a new Tesco Metro store with flats above in Rickmansworth, Hertfordshire.

Prestige Retirement Apartments, Woking

Thameswey Sustainable Communities was asked by Retirement Villages to provide a Renewable Energy Options Appraisal and Energy Statement for a development of 48 retirement apartments. The solution was based on a combination of ground-mounted PV arrays with a small CHP and high energy efficiency building fabric.

10 Industrial Units, Hounslow

The Ambit Group commissioned Thameswey Sustainable Communities to carry out detailed thermal modelling for the development of new industrial and employment units in Hounslow. Our work included appraising a number of options for meeting the emissions targets required by the London Plan, the design of a PV installation and production of commercial EPCs.

Iceland Retail Unit, Sheffield

We were appointed by Belgrave Land to deliver a Renewable Energy Options Appraisal, Energy Statement and SBEM calculations for a new 1,000m² Iceland store located on a retail park in Sheffield. The project required a solution that met Iceland's specific requirements for M&E design whilst meeting Sheffield City Council's planning targets for on-site generation of renewable energy.
