

Smart Metering

Our Approach

Smart Metering is critical to understanding how we use energy today and into the future, it will enable vastly improved control of energy costs and CO₂ output from homes and businesses. Thameswey Maintenance Services offer a complete metering and billing solution, meter installations can also be project managed and carried out by our dedicated team.

Customers using Thameswey's smart meters include Sainsbury's, Network Rail, Skanska, Deloitte, Nandos and Café Rouge.

Thameswey's in house customer services team remotely read meters and provide accurate billing to customers with no need for regular reporting of meter readings by the customer, resulting in far greater customer security and no estimated bills.

Our Expertise

Our expertise includes but is not limited to:

- Smart Metering – from design to billing
- Installation of new energy systems
- Tri-Generation and CHP
- District Power Networks up to 11kv
- District Heating Networks
- Operation and maintenance of new and existing equipment

Our Clients

Our clients include:

- E-ON
- Genesis Housing Association
- Peacocks Housing Association
- Woking Borough Council

Our Accreditations

Remote Meter Reading

A simple communication module

Thameswey's remote reading systems are based on simplicity. By mounting or retrofitting a communication module in an electricity, heat, gas or water meter it is possible to upgrade one single installation or an entire meter fleet quickly and easily for remote reading. Reading via modem, M-Bus or LON-Works – just insert one single module into the meter. And if you want it even easier – with wireless reading – just insert a radio module. It's as simple as that!!

Automatic Meter Reading (AMR)

Standard components with numerous combination possibilities

At Thameswey we know that there are many and significant advantages for utilities to automate reading of consumption. We also know that the advantages are based on the fact that the system is implemented correctly and in accordance with existing procedures and processes of the utility. Therefore, our systems are built up on well-known, tested standard components which can be combined to cover your needs.

RHI Compliance

Ensuring compliance at all times

Automatic meter reading provides increased performance in the data collection. You avoid reading errors and missing meter readings. Reading data automatically also provides increased security of data flow between the AMR system and other applications. Avoiding manual data entry or manual data transfer a potential source of error is eliminated.

Billing

Improved customer service

With automatic meter reading utility bills are based on actual consumption. This generates a steady cash flow. Billing is based on real time data and estimated bills are no longer necessary. On-demand reads can be done as part of your customer service.
